

# Manual Pipettes

# Performance Champion

## Low Forces – Extreme Accuracy

### Total hand comfort

Whether it's actively in use or resting in your hand, a pipette must fit and feel right at all times. Through subtle improvements to the highly acclaimed Pipet-Lite's grip, body, finger-hook and surface texture, we've made Pipet-Lite XLS the most balanced and comfortable pipette on the market.

### Lower spring forces

Lighter springs and low drag seals, along with RAININ's patented Magnetic Assist™ technology enabled us to create a plunger that is smooth and precise, yet requires less force than ever.

### Less thumb stress

Models with the patented LTS™ (Lite-Touch System) dramatically reduce the stress of tip ejection. Cylindrical-shaft pipettes, and matching LTS tips with a small sealing area and a positive stop, let you know exactly when the seal is made – no need to pound the shaft into the tip!

### Calibration tracking

Embedded RFID (radio-frequency identification) tags in every Pipet-Lite XLS provide asset calibration and management for your pipette inventory and maintenance schedules. Note: Requires LabX™ Direct Pipette-Scan™ software and RFID reader.

### Pipet-Lite™ XLS™ with RFID

The best in class just got better

The new Pipet-Lite XLS is the most ergonomic manual pipette on the market with proven accuracy and precision. Its comfortable handle, light springs and "Magnetic Assist" technology, ensure light and smooth operation, and significantly reduce the risk of repetitive strain injuries. Pipet-Lite XLS is the world's first pipette equipped with RFID tags for advanced calibration and asset management. Tip shaft options included low-force LTS for improved ergonomics and universal-fit.

**METTLER TOLEDO**

# Pipet-Lite™ XLS™ with RFID

The Performance Champion

## Standard equipment

- Ergonomic handle design with comfortable fingerhook
- Improved volume adjustment lock prevents drift
- Built-in shock absorber inside the tip ejector reduces thumb impact
- Autoclavable quick-release tip ejector on all models
- Available with LTS, and universal tip/shaft configuration for use with universal tips

Optional RFID Reader works with all Rainin RFID-enabled pipettes, and interfaces with METTLER TOLEDO's LabX™ Direct Pipette-Scan™ calibration check.
